

**Office of Regulatory Staff  
New Nuclear Development Update Report  
V.C. Summer Units 2 & 3**

---

During the week of February 26, 2018, Office of Regulatory Staff – New Nuclear Development personnel (NND Personnel) worked at the VC Summer site on Monday.

On Monday February 26, NND Personnel attended the Plan of the Day meeting which focused on safety, SCE&G security and demobilization/abandonment of the site. The following activities were discussed:

- Saulsbury Industries is staffing up on site. Saulsbury expects to have a total of 16 personnel onsite.
- Concrete Batch Plant constituent removal continued. Approximately 5 Loads of material was still left to be removed from site.
- The Westinghouse Auction company will be back on site to prepare for the Batch Plant Auction. The Batch plant is expected to be sold by April of 2018.
- Fairfield County Assessor will be on site this week.

After the meeting, NND Personnel met with the SCE&G Abandonment Manager and discussed the Santee Cooper Board meeting results and how the Preventative Maintenance (PM) preservation would progress. The SCE&G Abandonment Manager stated that Santee Cooper owns all the plant equipment (with the exception of the Southern Nuclear Company equipment sales list), and has access to the site and warehouses to conduct PM's as necessary.
